

Alexander & Baldwin, Inc. Reports Fourth Quarter and Full-Year 2022 Results

HONOLULU, Feb. 28, 2023 /PRNewswire/ -- **Alexander & Baldwin, Inc.** (NYSE: ALEX) ("A&B" or "Company"), a Hawai'i-based company focused on owning and operating high-quality commercial real estate in Hawai'i, today announced financial results for the fourth quarter and full-year of 2022.

Chris Benjamin, A&B chief executive officer, stated: "Our high-quality portfolio of grocery-anchored retail, industrial and ground lease assets continued to perform well in the fourth quarter, closing out a year of exceptional results. During 2022, commercial real estate ("CRE") portfolio Net Operating Income ("NOI") increased by 6.3% over 2021 to \$117.8 million. Leasing activity remained robust as we finished the year with total leased occupancy of 95.0%, along with 4.4% full-year re-leasing spreads."

"We made meaningful progress in advancing our strategic agenda during the year as we closed on the sale of approximately 20,200 acres of non-core landholdings. While we haven't yet sold Grace Pacific, we took the decisive step in the fourth quarter of committing to a plan to sell and classifying the business as a discontinued operation. With our business simplification process nearly complete, we are focused on utilizing our strong balance sheet to expand our premier CRE portfolio. Redevelopment options within our portfolio, as well as a pipeline of potential acquisitions, give us confidence that we will be able to capitalize on opportunities across our target markets and preferred asset classes."

"Lastly, I would like to congratulate Lance Parker on his promotion to president and chief executive officer of A&B, effective July 1. Lance will maintain a keen focus on operating and growing our CRE platform, while I work to complete the Company's strategic transformation into a CRE company. I have the utmost confidence in Lance and our entire team to demonstrate the strength of the A&B platform and create value for shareholders in 2023 and beyond."

Change in Segments and Financial Presentation

During the fourth quarter of 2022, the Company changed its segment reporting in its financial statements to reflect how it now manages its continuing operations. The specific changes were made in conjunction with the Company presenting its materials and construction operations, including Grace Pacific, as held for sale and discontinued operations in its financial statements, pursuant to which the Company eliminated the former Materials & Construction segment and reclassified its joint venture interest in a materials company to the Land Operations segment.

The impact of the changes to the Company's segment reporting has been retrospectively reflected in the financial information for the prior periods presented in this release, resulting in changes in Land Operations segment Operating Profit (Loss) of \$0.1 million and \$(3.3) million during the three months ended December 31, 2022 and 2021, respectively. The full-year impact to Land Operations Operating Profit (Loss) was \$2.7 million and \$(2.5) million for the years ended December 31, 2022 and 2021, respectively. Prepaid expenses and other assets for Land Operations increased by \$26.1 million and \$23.4 million as of December 31, 2022 and 2021, as a result of the change in segment reporting. Additional information about these changes is included in the appendix.

CRE Redevelopment

Land Operations

- Land Operations operating profit was \$5.7 million in the fourth quarter of 2022, as compared to \$29.9 million in the fourth quarter of 2021. Land Operations operating loss was \$1.4 million for the year ended December 31, 2022, as compared to an operating profit of \$53.2 million for the year ended December 31, 2021. The year-over-year decline in performance was partly attributable to charges during 2022 to the Land Operations segment related to the termination of the defined benefit pension plans, and lower non-core monetization compared to the elevated amount in the prior year (sale of Kukui'ula residential development and unimproved property sales), partially offset by gain recognized upon the sale of McBryde Sugar and McBryde Resources in the second quarter of 2022.
- Land Operations Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization ("Adjusted EBITDA") was \$10.7 million for the fourth quarter of 2022, as compared to \$30.2 million in the fourth quarter of 2021. Land Operations Adjusted EBITDA was \$67.0 million for the year ended December 31, 2022, as compared to \$54.3 million for the year ended December 31, 2021.
- The Company continued to monetize assets including the following transactions that closed in 2022:
 - Approximately 18,900 acres of primarily non-core conservation and agricultural land on the island of Kaua'i and 100% of the Company's ownership interest in McBryde Resources, Inc., associated with the McBryde Sale in exchange for cash proceeds of \$73.9 million.
 - Approximately 1,300 acres of other non-core landholdings in exchange for cash proceeds of \$18.3 million
 - 4.9 acres at Maui Business Park II in exchange for cash proceeds of \$7.7 million.
- Performance of this segment prospectively will be driven by future land sales activity.

USE OF NON-GAAP FINANCIAL MEASURES

The Company uses non-GAAP measures when evaluating operating performance because management believes that they provide additional insight into the Company's and segments' core operating results, and/or the underlying business trends affecting performance on a consistent and comparable basis from period to period. These measures generally are provided to investors as an additional means of evaluating the performance of ongoing core operations. The non-GAAP financial information presented herein should be considered supplemental to, and not as a substitute for or superior to, financial measures calculated in accordance with GAAP.

NOI is a non-GAAP measure used internally in evaluating the unlevered performance of the Company's Commercial Real Estate portfolio. The Company believes NOI provides useful information to investors regarding the Company's financial condition and

results of operations because it reflects only the contract-based income and cash-based expense items that are incurred at the property level. When compared across periods, NOI can be used to determine trends in earnings of the Company's properties as this measure is not affected by non-contract-based revenue (e.g., straight-line lease adjustments required under GAAP); by non-cash expense recognition items (e.g., the impact of depreciation and amortization expense or impairments); or by other expenses or gains or losses that do not directly relate to the Company's ownership and operations of the properties (e.g., indirect selling, general, administrative and other expenses, as well as lease termination income). The Company believes the exclusion of these items from operating profit (loss) is useful because the resulting measure captures the contract-based revenue that is realizable (i.e., assuming collectability is deemed probable) and the direct property-related expenses paid or payable in cash that are incurred in operating the Company's Commercial Real Estate portfolio, as well as trends in occupancy rates, rental rates and operating costs. NOI should not be viewed as a substitute for, or superior to, financial measures calculated in accordance with GAAP.

The Company reports NOI and Occupancy on a Same-Store basis, which includes the results of properties that were owned and operated for the entirety of the prior calendar year and current reporting period, year-to-date. The Company believes that reporting on a Same-Store basis provides investors with additional information regarding the operating performance of comparable assets separate from other factors (such as the effect of developments, redevelopments, acquisitions or dispositions).

Reconciliations of Commercial Real Estate operating profit (loss) to Commercial Real Estate NOI and Same-Store NOI are as follows:

FFO is presented by the Company as a widely used non-GAAP measure of operating performance for real estate companies. The Company believes that, subject to the following limitations, FFO provides a supplemental measure to net income (calculated in accordance with GAAP) for comparing its performance and operations to those of other REITs. FFO does not represent an alternative to net income calculated in accordance with GAAP. In addition, FFO does not represent cash generated from operating activities in accordance with GAAP, nor does it represent cash available to pay distributions and should not be considered as an alternative to cash flow from operating activities, determined in accordance with GAAP, as a measure of the Company's liquidity. The Company presents different forms of FFO:

- Core FFO represents a non-GAAP measure relevant to the operating performance of the Company's commercial real estate business (i.e., its core business). Core FFO is calculated by adjusting CRE operating profit to exclude items in a manner consistent with FFO (i.e., depreciation and amortization related to real estate included in CRE operating profit) and to make further adjustments to include expenses not included in CRE operating profit but that are necessary to accurately reflect the operating performance of its core business (i.e., corporate expenses and interest expense attributable to this core business) or to exclude items that are non-recurring, infrequent, unusual and unrelated to the core business operating performance (i.e., not likely to recur within two years or has not occurred within the prior two years). The Company believes such adjustments facilitate the comparable measurement of the Company's core operating performance over time. The Company believes that Core FFO, which is a supplemental non-GAAP financial measure, provides an additional and useful means to assess and compare the operating performance of REITs.
- FFO represents the Nareit-defined non-GAAP measure for the operating performance of the Company as a whole. The Company's calculation refers to net income (loss) available to A&B common shareholders as its starting point in the calculation of FFO.

The Company presents both non-GAAP measures and reconciles each to the most directly-comparable GAAP measure as well as reconciling FFO to Core FFO. The Company's FFO and Core FFO may not be comparable to FFO non-GAAP measures reported by other REITs. These other REITs may not define the term in accordance with the current Nareit definition or may interpret the current Nareit definition differently.

Reconciliations of net income (loss) available to A&B common shareholders to FFO and Core FFO are as follows:

The Company may report various forms of Earnings Before Interest, Taxes, Depreciation and Amortization ("EBITDA"), on a consolidated basis or a segment basis (e.g., "Consolidated EBITDA" or "Land Operations EBITDA"), as non-GAAP measures used by the Company in evaluating the Company's and segments' operating performance on a consistent and comparable basis from period to period. The Company provides this information to investors as an additional means of evaluating the performance of the Company's and segments' ongoing operations.

Consolidated EBITDA is calculated by adjusting the Company's consolidated net income (loss) to exclude the impact of interest expense, income taxes and depreciation and amortization. Land Operations EBITDA is calculated by adjusting Land Operations operating profit (which excludes interest expense and income taxes) to add back depreciation and amortization recorded at the Land Operations segment.

The Company also adjusts Consolidated EBITDA or Land Operations EBITDA (to arrive at "Consolidated Adjusted EBITDA" or "Land Operations Adjusted EBITDA") for items identified as non-recurring, infrequent or unusual that are not expected to recur in the Company's core business or segment's normal operations.

As an illustrative example, the Company identified non-cash pension termination charges as a non-recurring, infrequent or unusual item that is not expected to recur in the consolidated or segment's normal operations (or in the Company's core business). By excluding these items from Segment EBITDA and Consolidated EBITDA to arrive at Segment Adjusted EBITDA or Consolidated Adjusted EBITDA, the Company believes it provides meaningful supplemental information about its core operating performance and facilitates comparisons to historical operating results. Such non-GAAP measures should not be viewed as a substitute for, or superior to, financial measures calculated in accordance with GAAP.

Reconciliations of the Company's consolidated net income to Consolidated EBITDA and Consolidated Adjusted EBITDA are as follows:
